

## Health & Safety Policy

At **The GDM Island hotel** our main target is to provide a safe place for our guests and employees.

We are committed to maintain, develop and update continuously our health & safety policies in order to ensure a safe and secure place for all.

Safety considerations are a part of our daily work and this is what we essentially do at The Island hotel :

- We carry out controls of the evacuation routes, fire equipment and fire alarm system
- Employees are being trained in first aid and the use of the firefighting equipment
- An emergency team is in place 24h a day to provide assistance to various emergency situations that may appear
- A doctor is on site twice a day
- We continuously improve hotel methods of operation and we carry out preventive maintenance of our buildings and equipment for a safer environment
